EDUCATION

Bachelor Electronics Engineering, HTS-E Rens & Rens – graduated, November 26, 1965.

EMPLOYMENT

Java Developer | Rienks Arbodienst – Dec 2013 - Nov 2017

- Migrated the data of the Lotus Notes Absence Registration & Monitoring system to an external online system.
- Designed and developed the Billing Manager, and reduced the billing time from 14 days to 2 days.
- Designed and developed the Management Information System to provide real-time insight into the performance of the company doctors, and the consultants.
- I maintained the online absence registration portal.

Java and IBM Lotus Domino Developer & Instructor | AppliGate – Jul 1994 - Nov 2013

- First in the Netherlands with the course 'Hardware Beheer PC'.
- Developed the first AppliGate website in 1996 where students could register online for a AppliGate course.
- First Lotus Authorized Education Center in the Netherlands in 1994, LAEC of the year in the Netherlands in 2000.
- Designed and won the contract for the course for IBM WebSphere Portal Masterclass: model address book, JEE (Servlet/JSP) web application, and transformation to IBM WebSphere Portlet.
- IBM Champion 2011/2012 for Lotus and IBM Collaboration Solutions.

SOFTWARE PROJECTS

Personal projects:

- Developed an IoT monitoring system using Scala/Akka and Python to keep a family informed about the status of an elderly.
- [Front-end/ back-end demo project](#) using AngularJS/JavaScript, Firebase, and JEE (Restlet framework).
- Designed the course [How to use Managed Beans in XPages](#), part 1, and part 2.

AppliGate Website: www.appligate.nl.

- Built the AppliGate website using IBM Lotus Domino and Javascript.
- Built all internal business applications needed to function as a Lotus Authorized Educations Centre in the Netherlands, using IBM Lotus Notes & Domino and LotusScript.
- Redesigned the AppliGate website using the Restlet framework, Java, and Google App Engine.
- Developed the Event Scheduler for scheduling training courses, using the Restlet framework and Java.

Medical Record Android app:

- Developed the backend for the Android app using the Restlet framework, Java, Lotus Domino.

Billing manager:

- Automated the billing process as a replacement for a Microsoft Excel-based application using UML, IBM XPages (JSF) and Java.
- Build a SOAP interface for communication with the online financial administration using Java.
- Modernized the declaration system using LotusScript and Java.
- Added a Management Information System, for an overview of the declarations per month by an employee, department, or customer using IBM XPages (JSF) and Java.

Online Absence registration portal:

- Added 2-factor authentication to the online access of the Absence Registration system using the Restlet framework, Java, and JQuery.
- I maintained the online Absence registration system using Spring and Java.

Internal Absence registration and monitoring system:

- I maintained the communication with external systems using LotusScript, XML, and XSLT.
- Developed a connection with AFAS Profit systems using the Restlet framework, Java, and SOAP.

SKILLS

Software: (proficient): Java, LotusScript, Docker, REST (familiar): Scala, Akka, Python, SQL, JavaScript, Julia, HTML/CSS, XML, XSLT, SOAP.
